

# Ultrafidelity Computer Music Player

Enabled with SSE, the Sonic Studio Engine

## Amarra :: Ultrafidelity Playback from Your Mac

Sonic Studio presents the Amarra Computer Music Player, the audiophile quality computer music player for the most discriminating enthusiast. Amarra represents the next generation of computer based music players and is designed using the same technology in use today by record companies worldwide for producing CD, DVD and Blu-ray titles.

## Amarra :: Works with iTunes

Coupled with the convenience of iTunes, the world's most popular music delivery system, Amarra provides a seamless integration of multiple sample rates and music formats. Organize your music as you like it and Amarra automatically handles PCM and lossless files, while using iTunes for all compressed formats.

## Amarra :: Simply Sounds Better

It's easy to make audio sound good on a computer but it takes specialized knowledge to make fabulous sounding music. At every step in the processing chain, particular attention has been paid to achieve the best quality possible. Amarra is a critical audio component in your complete high fidelity system.

- Advanced algorithms assures accurate musical reproduction
- Automatic hardware sample rate switching — no need to relaunch iTunes
- Legendary, minimal phase Sonic EQ™
- Integrated Gain Structure & reithering

## Amarra :: Software Features

- The convenience of iTunes
- Automatically switches to iTunes for compressed music formats
- Playlist Mode sidelines iTunes for gapless playback
- Natively plays Compact Discs — no ripping
- Native support for Apple Lossless
- Plays all high resolution PCM formats up to 192 kHz sample rates
- Background Sample Rate Conversion lets you up or downsample your library
- Pristine audio quality from Sonic Studio's proprietary SSE™ engine
- Use your Apple or iPod Remote & Rowmote software

## Amarra :: Purchase
