Sonic Studio showcases Amarra for TIDAL iOS Remote and Windows version at RMAF

Company partners showcase Amarra as their ultra–fidelity source

San Francisco, CA — Sonic Studio, US manufacturer of high performance music software, reports that they will be demonstrating two innovative products at Rocky Mountain Audio Festival (RMAF) this year: the new iOS remote for Amarra for TIDAL and their first Windows release—Amarra for TIDAL for Windows.

Amarra for TIDAL is Sonic Studio's music player designed specifically for TIDAL streaming music service and includes their world-class, real-time EQ (or equalization). Amarra for TIDAL gives the user access to powerful tools to custom tailor the sound of TIDAL's Hifi streaming music. Fourteen factory Sonic EQ presets supplement the response of popular headphone models, while additional presets fine-tune playback for popular music genres. An infinite number of custom presets can also be saved and recalled at any time. Now with iRC Room Correction, Amarra for TIDAL is the best sounding TIDAL player available today. Amarra for TIDAL for Windows provides the same features as the OSX version. with iRC support coming in a following update.

The Amarra for TIDAL Remote is an iOS application for iPhone and iPad allowing complete remote control of Amarra for TIDAL. The iOS Remote provides access to tracks, albums, artists, genres, now playing, and access to remote playlists with its clean and simple user interface. The integrated EQ window allows control of all settings including, boost, frequency, Q, EQ presets, volume control (meters), and output device control. The Amarra for TIDAL iOS remote is slated for release in November 2015.

About Sonic Studio
Sonic Studio, LLC is the premier manufacturer of computer-based ultra-fidelity music playback systems. Their Amarra consumer software redefines fidelity for file–based audio entertainment. Sonic Studio's Emmy award-winning NoNOISE II suite is the leading audio restoration toolset for archivists and record labels while their soundBlade line for content creation and premastering define the state of the art in quality. Sonic Studio's eleventh generation digital audio workstations are in use at major studios, record labels, broadcast and post production facilities worldwide. Based in San Francisco California, Sonic Studio has an international network of distributors and channel partners who share their commitment to quality and service.
