

SonicStudio•DDP — Read Me

Thank you for your purchase of SonicStudio•DDP. This file contains important Information about the installation and operation of the application.

Requirements

SonicStudio•DDP requires the following:

- Apple Macintosh G4 or G5
- 12" or larger display
- 512 MB RAM minimum, 1 GB preferred
- OS 10.3 or newer

Since SonicStudio•DDP uses CoreAudio, the quality of your playback will be entirely dependent on the hardware and driver used. Note that, though SonicStudio•DDP is not tested with prior versions of Macintosh hardware, operation with older hardware should be uneventful as long as the CPU supports the required OS version.

Installation

To install SonicStudio•DDP, please refer to the printed Quick Start Guide provide in your SonicStudio•DDP package. A PDF copy of the Quick Start Guide is also provided on the Installation CD-ROM.

Features

In addition to the standard functions listed in the User Manual, the following undocumented feature is present:

- 1) In the Mark Info's track list, double clicking on a row will start playback at that mark's location.

Known Issues

-  A behavior has been observed whereby the OS ceases to recognize the dongle, especially after awakening from sleep mode. Logging out and back in will usually address the problem but a restart may be required.

Contact Us

We are always interested in your experiences with the product. Bug reports should be e-mailed to support@sonicstudio.com. If you have suggestions for improving the operation of the application, e-mail your enhancement request to enhancements@sonicstudio.com. for up to date information on all of Sonic Studio's products, visit www.sonicstudio.com.
