## **Sonic Studio Intros reNOVator for soundBlade**

*Standout Restoration Tool Arrives on Benchmark Platform*

Marin County, CA – January 10, 2006 — Sonic Studio, LLC, the leader in ultra-fidelity production tools for audio engineers, announced the release of reNOVator™ for soundBlade, the first 3rd party option to appear for soundBlade. This release also marks the first product resulting from their cooperative agreements with Algorithmix.

reNOVator is a high resolution audio repair option that eliminates problematic disturbances from digital audio tracks, selectively removing interfering events while perfectly preserving the sound quality of the original material. Unlike other superficially similar tools, reNOVator does its work in the linear-phase domain, so repairs are exceptionally clean and free of artifacts, even with very noisy recordings.

Working directly in a Project rather than as a plug-in, reNOVator for soundBlade provides precise definition of impairments in both the time and frequency domains while allowing complete undo/redo capabilities at any time during the life cycle of a job. reNOVator for soundBlade is also not hampered by the limitations of operating system, application or plug-in frameworks, finally allowing the full fidelity of the process to be realized. reNOVator for soundBlade is also the first version of reNOVator for Mac OS that is, feature for feature, on a par with Windows implementations.

Combining Sonic Studio's groundbreaking quality, workflow and editorial know-how with the signal processing expertise of Algorithmix, reNOVator for soundBlade is available now, for US\$2995, through Sonic Studio's international network of distributors and channel partners who share the company's commitment to quality and service. For more information, or to arrange a trial in your studio, visit [www.sonicstudio.com](http://www.sonicstudio.com).

### **About Sonic Studio**

Sonic Studio is the premier manufacturer of ultra-fidelity DSD and PCM content creation systems. Sonic Studio's Emmy award-winning NoNOISE II suite is the leading audio restoration toolset for archivists, record labels, videographers and forensic investigators while their product lines for Red and Scarlet Book premastering define the state of the art. Sonic Studio's digital audio workstations and software are in use at all major studios, record labels and post production facilities worldwide. Based in Marin County, California, Sonic Studio has sales offices in Texas and an international network of distributors and channel partners who share their commitment to quality and service.
