## **Sonic Studio Ships Enhanced PMCD Version**

*Newest Release Includes Significant Ease of Use Improvements*

Marin County, CA – May 17, 2006 — Sonic Studio, LLC, the leader in ultra-fidelity production tools for audio engineers, today announced a new revision of their premastering application, PreMaster CD. First released 60 days ago to favorable user reviews, the product is now shipping to distribution worldwide.

PreMaster CD is a simplified version of Sonic Studio's full featured premastering application. The latest release adds a new, automated simplicity to the task of premastering that both accomplished engineers and newcomers alike will appreciate. PreMaster CD combines value pricing with effortless creation of one-off CDs and replication masters and, it runs natively on the secure and user friendly Mac OS X.

"This new release answers the call we've had from the pro audio community for our high end premastering functionality with even more automated PQ creation and super fast re-sequencing," says Jayson Tomlin, VP, Sales & Business Development. He adds, "We've delivered that in version 1.1 of PMCD while retaining the legendary compatibility of our DDP file sets, a reliability that other Mac vendors can't provide."

Though PreMaster CD version 1.1 carries an MSRP of \$795, Sonic Studio is offering special pricing during the Audio Engineering Society Convention this month in Paris. It is available now, both on-line at Sonic Studio's web store and through an international network of distributors, for the special show price of US\$495. For more information or to order a copy, visit [www.sonicstudio.com](http://www.sonicstudio.com).

### **About Sonic Studio, LLC**

Sonic Studio is the premier manufacturer of ultra-fidelity DSD and PCM content creation and postproduction systems. Sonic Studio's Emmy award winning NoNOISE suite is the leading audio restoration toolset for archivists, record labels, videographers and forensic investigators while their product line for Red and Scarlet Book premastering and authoring defines the state of the art. Sonic Studio's digital audio workstations are installed at all major studios, record labels and post production facilities worldwide. Based in Marin County, California, Sonic Studio has support and sales offices in Texas and an international network of distributors and channel partners who share their commitment to quality and service.
