Sonic Studio Ships Version 2.0 of PreMaster CD

Premastering Trend Setter Expands with New Features & Options

Marin County, CA – March 7, 2007 — Sonic Studio, LLC, the leader in ultra-fidelity production tools for audio engineers, announced the release of a new version of their low cost premastering application, PreMaster CD 2.0. With progressive features and options, PreMaster CD 2 further cements its position as the go-to application for CD creation on the Mac.

Borrowing some of the high end features that Sonic Studio is known for, PreMaster CD 2.0 adds more background processing, more control and more functionality. In addition, options are now on tap to customize the application's already strong collection of features. This new release consolidates all the maintenance changes incorporated into the code base while adding the ability to support options, including Manual DeClick II and DDP File Open for both split and consolidated DDP file sets. A new Master Section, with large, adjustable metering, a master fader with dim, and convenient management of redithering parameters, offers centralized command and control. Other additions include export to BWF and AIFF along with optimized processing of waveform metadata.

Tom Swift, owner of Swift Kick Productions, in Seaford NY, has found his copy indispensable. "Not only does PMCD create audio CDs, but also bulletproof DDP file sets, which eliminates problems in the CD manufacturing process and saves me hundreds of dollars. PMCD is easy to use, and has powerful editing capabilities, versatile fade algorithms, superb dithering and sound fidelity...As an engineer, I rest easier knowing that I'm providing clients with product created by the company that pioneered and maintains the lead in desktop CD production."

With a feature set unique for its price point, PreMaster CD 2.0 is available now starting at US \$495. It's also on the web at store.sonicstudio.com and through Sonic Studio's international network of distributors and channel partners who share the company's commitment to quality and service. For more information, or to arrange a trial listen in your studio, visit www.sonicstudio.com.

About Sonic Studio

Sonic Studio is the premier manufacturer of ultra-fidelity DSD post and PCM content creation systems. Sonic Studio's Emmy award-winning NoNOISE II suite is the leading audio restoration toolset for archivists, record labels, videographers and forensic investigators while their product lines for Red and Scarlet Book premastering define the state of the art. Sonic Studio's digital audio workstations and software are in use at major studios, record labels, broadcast and post production facilities worldwide. Based in Marin County, California, Sonic Studio has offices in Southern California and Texas, and an international network of distributors and channel partners who share their commitment to quality and service.
