soundBlade One Twenty One Ships

Company Distributes Latest Edition of Leading Product

Marin County, CA — December 19, 2007 – Sonic Studio, LLC, the leader in ultra-fidelity production tools for audio engineers, has started shipments of the 1.2.1 release of their flagship professional product, soundBlade. First shown at the 123rd convention of the Audio Engineering Society in New York, the product has entered distribution channels worldwide.

soundBlade continues to answer a busy engineer's need for a streamlined, high fidelity alternative to other production tools. soundBlade combines ease of use and exceptional value with features that streamline everyday jobs. Running natively on the secure and user friendly Mac OS X, soundBlade relies on Core Audio for default I/O so hardware lock-in is eliminated. The 1.2.1 release incorporates hundreds of optimizations and stability enhancements as well as several new features.

Of the many and varied soundBlade users, Chris Hatzistamou wears several musically related hats. As a composer, musician, orchestrator, producer, sound engineer and co-owner of Athens Mastering, he has access to a broad range of tools for the mastering, authoring and restoration service mix the company offers. His tool of choice for high end jobs is soundBlade. "soundBlade 1.2.1 is a mature product and my DAW of choice for critical mastering projects. It's very fast, has the best editing model and the sound is real, not fatiguing, and without the coloration I hear from other programs." Fidelity, workflow and features that matter are the reasons Hatzistamou and hundreds of other top flight engineers and major record labels rely on Sonic Studio.

Combining Sonic Studio's benchmark premastering functionality with the signal processing, restoration and comprehensive editing that discriminating mastering engineers are looking for, soundBlade carries an economical MSRP of \$1495. A free update for existing owners, it is available now through Sonic Studio's network of distributors and resellers. For more information, or to arrange a trial run, visit www.sonicstudio.com.

About Sonic Studio

Sonic Studio is the premier manufacturer of ultra-fidelity DSD post and PCM content creation systems. Sonic Studio's Emmy award-winning NoNOISE II suite is the leading audio restoration toolset for archivists, record labels, videographers and forensic investigators while their product lines for Red and Scarlet Book premastering define the state of the art. Sonic Studio's digital audio workstations and software are in use at major studios, record labels, broadcast and post production facilities worldwide. Based in Marin County, California, Sonic Studio has an international network of distributors and channel partners who share their commitment to quality and service.

soundBlade, NoNOISE II, sonicstudio.com and the Sonic Studio logo and type are trademarks of Sonic Studio, LLC in the United States and other countries. All other trademarks, trade names, service marks, and logos referenced herein belong to their respective companies.
