Sonic Studio Ships Superfresh soundBlade

Company Begins Distribution of Latest Edition

Marin County, CA — June 6, 2007 – Sonic Studio, LLC, the leader in ultra-fidelity production tools for audio engineers, began shipments today of the 1.2 release of their flagship professional product, soundBlade. First announced at the 122nd convention of the Audio Engineering Society in Vienna, the product has entered distribution channels worldwide.

soundBlade continues to answer a busy engineer's need for a streamlined, high fidelity alternative to other PCM production applications. soundBlade combines ease of use and exceptional value with features that speed day to day tasks. Running natively on the secure and user friendly Mac OS X, soundBlade relies on Core Audio for default I/O so hardware lock-in is eliminated. The application combines Sonic Studio's famed EFM™ and 4 point editing capabilities with their SSE™ real time audio engine and exceptional options such as Series 300™ DSP I/O processors and the NoNOISE II™ suite of restoration tools.

The 1.2 release incorporates hundreds of optimizations and stability enhancements as well as almost two dozen feature additions, including the highly anticipated 8 Channel option for surround work. Combining Sonic Studio's benchmark premastering functionality with the signal processing, restoration and comprehensive editing that discriminating mastering engineers have been asking for, soundBlade carries an economical MSRP of \$1495.

soundBlade is available now through Sonic Studio's international network of distributors and channel partners who share the company's commitment to quality and service. For more information, or to arrange a trial run in your studio, visit www.sonicstudio.com.

About Sonic Studio

Sonic Studio is the premier manufacturer of ultra-fidelity DSD post and PCM content creation systems. Sonic Studio's Emmy award-winning NoNOISE II suite is the leading audio restoration toolset for archivists, record labels, videographers and forensic investigators while their product lines for Red and Scarlet Book premastering define the state of the art. Sonic Studio's digital audio workstations and software are in use at major studios, record labels, broadcast and post production facilities worldwide. Based in Marin County, California, Sonic Studio has offices in Southern California and Texas, and an international network of distributors and channel partners who share their commitment to quality and service.
